Application Settings:

Recommended settings for heat transfer machines…

Temperature	Pressure	Dwell Time
275°F - 365°F	Medium/Firm	8 - 15 seconds

1. Screen print image with foil adhesive. Mesh count should be between 60 (24cm) and 110 (43 cm).
   - Automatic: *flood > print > print* could be used with an 86 mesh, *print > flash > print* would possibly give a better result with 86-110 mesh.
   - Manual: *print > flash > print* with an 86-110 mesh is suggested.
2. Cut the textile foil to the desired shape and place it, color side up, over the area chosen to be foiled.
3. Using the above settings, transfer the foil.
4. Use a soft cloth to rub the foil lightly and then peel the foil away.

This is a typical transfer process. We recommend you test the suitability of our foil for the field of application intended and under the transferring conditions at your facility. Adjust appropriately until desired results are achieved.

AMAGIC Textile Foil Adhesive by Virus

- PVC / Phthalate/ Formaldehyde free for safety & compliance concern
- Soft hand for high-end fashion;
- Crisp edge definition for a clean look;
- Easy to print and production friendly;
- Smooth foil peel, like butter;
- Excellent wash resistance, for long lasting wear;
- Low transfer temp, protects the foil color and shine during transfer.

AMAGIC Foil Sheeter

- Make thousands of foil sheets in just minutes;
- Easy to use, no special equipment required;
- Adjustable from 6” to 36” long sheets;
- Supports 200’ to 2,000’ long rolls;
- Handles up to 25” wide rolls;
- Handles multiple colors at the same time.

About Us

K Laser Technology (USA) / AMAGIC Textile Foils, a division of K Laser Technology (Taiwan), is a leading manufacturer of holographic foils, films and paper materials for design enhancement, brand authentication and consumer packaging. For over 20 years we have been delivering high quality, cost-effective and customer-oriented solutions that meet our customers' design objectives.
